IMPORTANT INSTRUCTIONS

- Please send all artwork in .AI file format.
- **Do not edit or move** any of the Guideline Layers.
- Please **package .AI files** with all fonts/typefaces and embedded content.
- Please keep all text editable and **do not create outlines from text.**
- InDesign and PDF files are not acceptable as print files.
- Please ensure Document Color Mode is set to **CMYK instead of RGB.**
- Please flatten or rasterize **all transparencies**.

Content Area — The content area is 1/8" (.125") from cut lines. Important artwork (especially text) should be placed inside this area, as labels can shift slightly during the cutting process.

Cut/Trim Line — Keeping artwork away from these edges ensures that it won't accidentally be cropped during Production.

Bleed Line — Any art (such as your background color) that should print all the way to the edge of the material should extend at least to these lines.

Fold Area — Important artwork (especially text) should not be placed in fold area.

Glue Area — No artwork should go in the Glue Area.

Template is built at 100%
